unseen analytical functional forms / scarf ii (N=64)
unseen analytical functional forms / cosh well (N=64)
seen basis reparameterization / rosen morse ii (N=16)
single parameter extrapolation / harmonic (N=1)
joint parameter extrapolation / fourier random (N=1)
single parameter extrapolation / morse (N=1)
joint parameter extrapolation / double well (N=1)
within range unseen parameter interpolation / harmonic (N=1)
near continuum states / radial coulomb (N=1)
valid spatial reflection / morse (N=1)
nonuniform resolution / harmonic (N=1)
constant potential shift / morse (N=1)
variable uniform resolution / harmonic (N=1)
changed domain same physical operator / harmonic (N=1)
anharmonic wells / anharmonic polynomial (N=19)
multiwell potentials / multiwell (N=1)
double wells / double well (N=19)
asymmetric wells / asymmetric well (N=1)
multiple barriers (N=1)
barriers / single barrier (N=19)
random smooth potentials / fourier random (N=19)
controlled smooth perturbations / smooth perturbed (N=1)
random smooth potentials / gaussian random field (N=19)
localized defects / localized defect (N=19)
OOD suite / family
